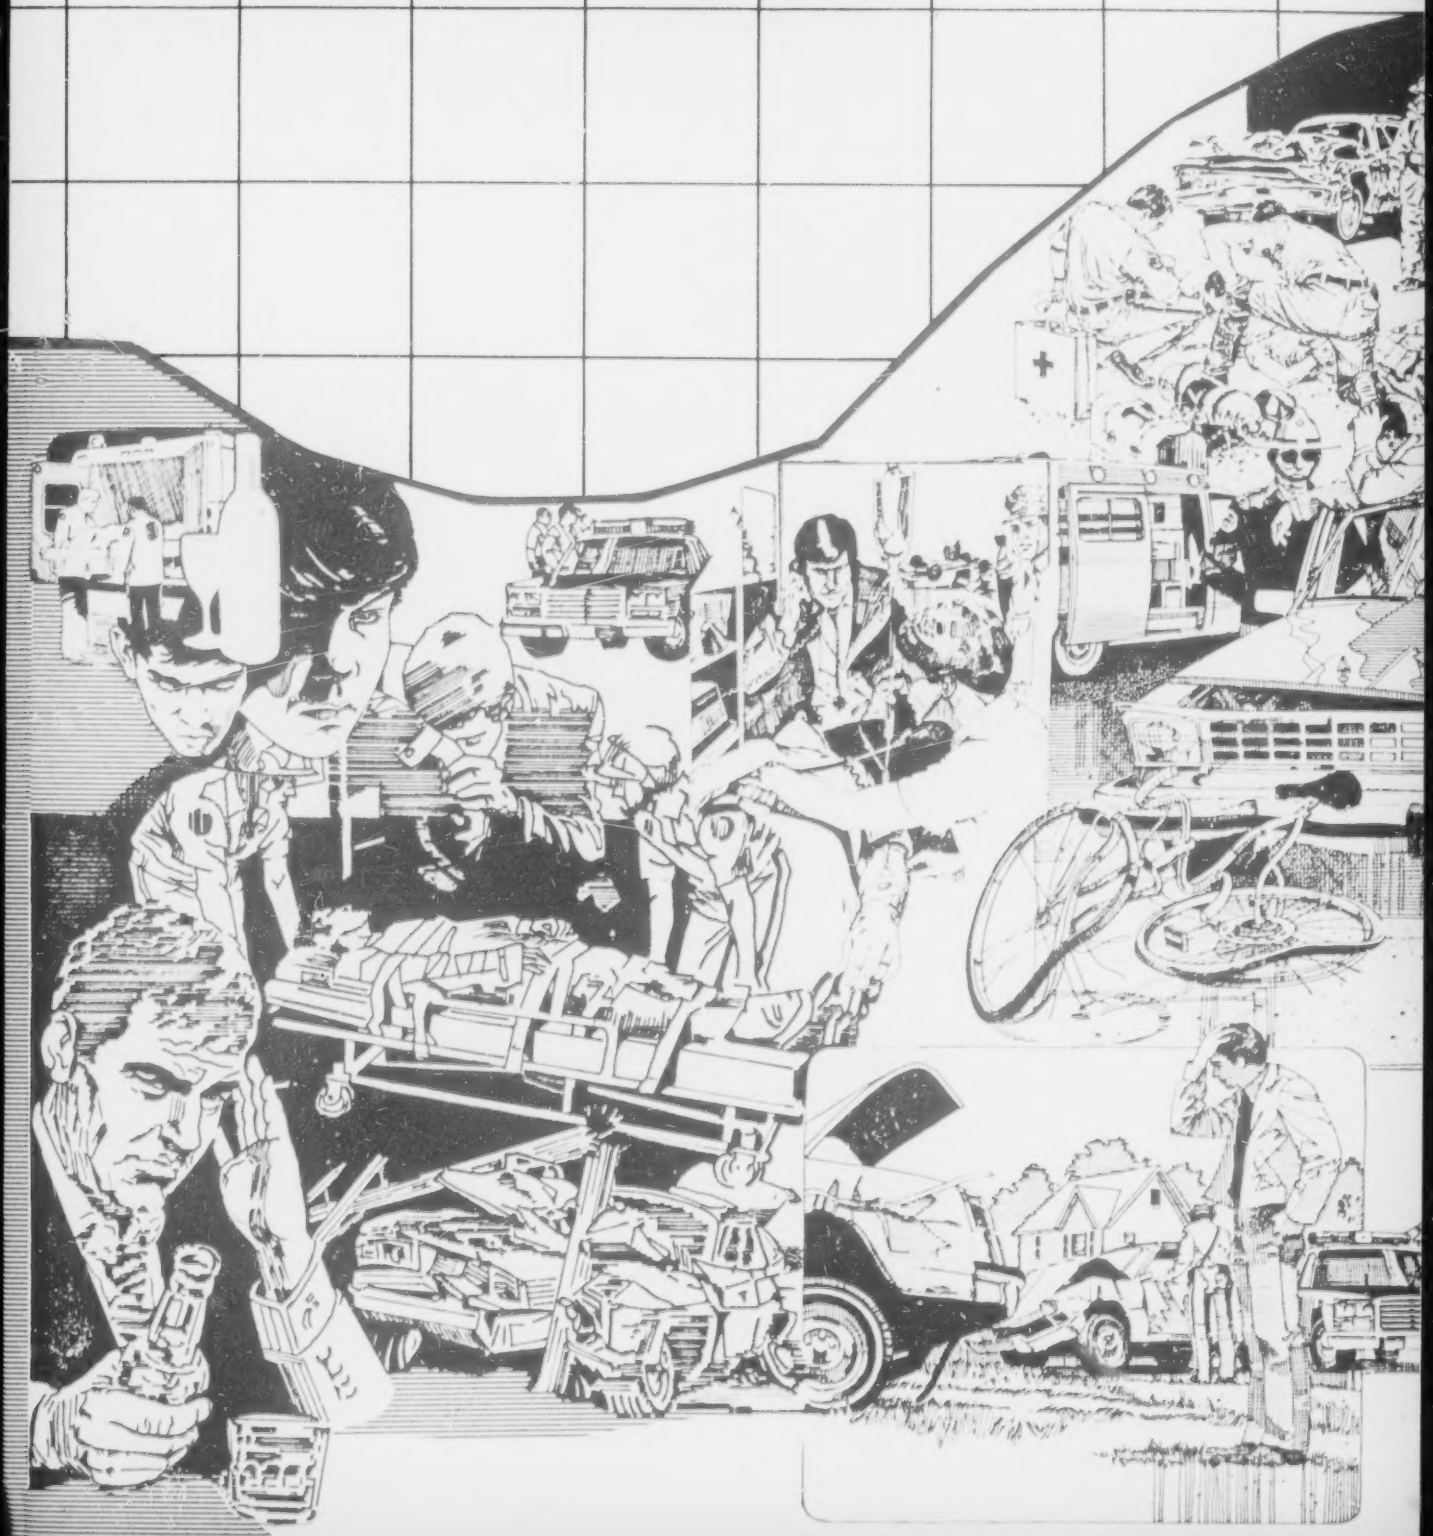
1986 SOUTH CAROLINA TRAFFIC ACCIDENTS

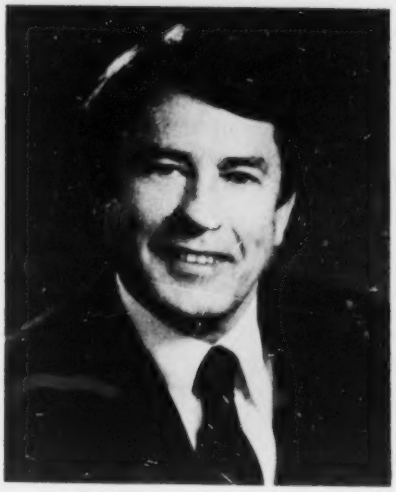


My mommy & daddy didn't wear safety belts.... who do I live with now?

This message from all the children under four years of age who are now protected by child restraint systems and who want their parents to wear safety belts *....

*and the South Carolina Department of Highways and Public Transportation

A message from the executive director . . . .



SOUTH CAROLINA
DEPARTMENT OF HIGHWAYS AND PUBLIC TRANSPORTATION
P.O. BOX 191
COLUMBIA, S.C. 29202

My fellow South Carolinians:

More people lost their lives in traffic accidents in 1986 than in any year since 1972. As the average number of licensed drivers, motor vehicle registrations and vehicle miles traveled has increased, so have traffic accidents and deaths.

I am deeply concerned about this problem and it is my personal goal to see that these grim statistics are reduced through public education and better enforcement.

At the same time, we are revising our Traffic Records System to capture data on accident causes, scientifically analyze that data and evaluate countermeasures to reduce or eliminate high hazard locations within our state.

With the cooperation of the public -- obeying traffic laws and using seat belts -- we can work toward containing and reducing the accident, injury and death rates on our streets and highways.

J. G. Rideoutte,
Executive Director

COMMON EFFECTS OF ALCOHOL ON DRIVING ABILITY

In South Carolina you are presumed to be under the influence when your B.A.C. is at a level of .10 percent. At this level you are seven times more likely to have an automobile accident than if your B.A.C. were zero (.00). If your B.A.C. reaches .15 percent, your chances of having an accident are 25 times greater.

B.A.C. LEVELS	COMMON EFFECTS
.03	Mild alteration of feelings. Level of impairment is not generally too serious.
.05	Feelings of relaxation, sedation and/or euphoria. Increase in reaction time. Increased difficulty in performing motor skills. Driving ability and judgment impaired.
.10	Physical and mental impairment affecting perception and performance. Deterioration in motor coordination. Hearing and speech impaired. Uncoordinated behavior. Legally presumed to be under the influence in South Carolina.
.15	Serious impairment of physical and mental functioning. Irresponsible behavior. Distorted perception and judgment. Difficulty in standing, walking and talking.
.40	Coma results. The person cannot be awakened.
.60	Death can result from alcohol overdose or accidental choking. At high B.A.C. levels, absorption of alcohol continues at a constant rate while oxidation slows because the high B.A.C. causes anesthetization of the heart and lungs. Death occurs when the respiratory and circulatory systems cease to function.

ACKNOWLEDGEMENTS

The Highway Safety Office of the Department would like to take this opportunity to express sincere appreciation to all persons, agencies, departments and organizations who have contributed to this publication.

The raw data from which this publication was taken was generated from Uniform Traffic Collision Reports for Investigating Officers which were submitted by members of the S.C. Highway Patrol, city policy departments and county police agencies. This Office gives special recognition to the above traffic investigative agencies and in doing so cannot forget the support and cooperation of the following organization within the Department of Highways and Public Transportation: Engineering Division, Motor Vehicle Division, Public Affairs Office, Map Drafting Unit of Planning, Data Processing Office and the Traffic Accident Research Section.

The Traffic Records System which produced the traffic collision and other pertinent data for this publication could not have done so without the untiring efforts of the above persons and organizations.
